FREE POSTAL DELIVERY.

Some Important Facts Relating to the New Order for Free Postal Delivery.

Forty Mail Boxes to be Distributed Throughout the City.

Four Letter Carriers to Distribute the Mail Twice Each Day.

According to latest advice from the postoffice department at Washington, the free delivery system will be inaugurated in Janesville on October first, employing four men to distribute letters within the three-quarter mile limit twice each day; for this service the carriers receive six hundred dollars per year each. For these several positions there are twenty or more applicants already, some of whom are mere boys. The post office regulations require letter carriers to be not less than eighteen years of age, and this will bar several who have been anticipating appointment. It is suggested that all the appointments be given to men of families, which no doubt will be the case.

Another important suggestion is that house occupants remove the old numbers on their buildings and place the new figures in a most conspicuous place, over the front or main door. Many of the house occupants retain the old numbers in a more conspicuous place than the new—these old numbers must be removed.

Agree, people wishing a prompt delivery of their mail matter should have their address printed on their stationery, in order that their letters may be properly addressed. While the mail carriers are supposed to be well posted regarding the streets and numbers, they are not supposed to know every person's residence, and when the street and number are omitted from the address the letter often finds its way into the "general delivery" at the postoffice. The "general delivery" is the postoffice, the "general delivery" is the postoffice, the "general delivery" is the postoffice.

Forty Mail Boxes to be Distributed Throughout the City.

Four Letter Carriers to Distribute the Mail Twice Each Day.

According to latest advice from the postoffice department at Washington, the free delivery system will be inaugurated in Janesville on October first, employing four men to distribute letters within the three-quarter mile limit twice each day; for this service the carriers receive six hundred dollars per year each. For these several positions there are twenty or more applicants already, some of whom are mere boys. The post office regulations require letter carriers to be not less than eighteen years of age, and this will bar several who have been anticipating appointment. It is suggested that all the appointments be given to men of families, which no doubt will be the case.

Another important suggestion is that house occupants remove the old numbers on their buildings and place the new figures in a most conspicuous place, over the front or main door. Many of the house occupants retain the old numbers in a more conspicuous place than the new—these old numbers must be removed.
